

# SURVEYS ON THEORIES IN ECONOMICS AND BUSINESS ADMINISTRATION

ISSN: 2010-1724

Chief Editor: **Kar-riu Wong**, *University of Washington, Seattle*

**Vol. 1**  
**A SURVEY OF DYNAMIC GAMES IN ECONOMICS**  
by **Van Long Ngo** (*McGill University, Canada*)

*"The ideas underlying differential game arose from Isaacs' Rand Paper P 257, in 1951, inspired by von Neumann at Rand. Subsequently, the focus turns pragmatic, and main applications come from — understandably — economics, the discipline about interactive decision-making with foresight. Befittingly, as differential game approaches its 60th anniversary, this volume appears as the best possible introduction for the interested readers. Professor Long, a top economist with wide ranging contributions, has covered the topic with clarity, eloquence, thoroughness and impeccable rigor."*

*Henry Y Wan, Jr., Professor of Economics, Cornell University*

This book provides readers with a comprehensive survey of models of dynamic games in economics, including an extensive coverage of numerous fields of applications. It will also discuss and explain main concepts and techniques used in dynamic games, and inform readers of its major developments while equipping them with tools and ideas that will aid in the formulation of solutions for problems.

**Readership:** Graduate students in economics, and academic economists, who are interested in applications of game theory to diverse fields of economics (such as development economics, resource and environmental economics, industrial organization).

**Vol. 2**  
**FINANCIAL AGGREGATION AND  
INDEX NUMBER THEORY**  
edited by **William A Barnett** (*University of Kansas, USA*) &  
**Marcelle Chauvet** (*University of California at Riverside, USA*)

The book surveys modern literature on financial aggregation and index number theory, with special emphasis on the contributions of the book's two coauthors. In addition to a systematic survey chapter unifying the rest of the book, this publication contains reprints of published articles that are central to the survey chapter.

*Financial Aggregation and Index Number Theory* provides a reference work for financial data researchers and users of central bank data, placing emphasis on possible improvements in such data from use of the microeconomic index number and aggregation theory.

**Readership:** Graduates students and advanced undergraduate students in macroeconomics and monetary economics; central banker economists; professionals in macroeconomic policy; researchers on the applications of aggregation and index number theory; students and researchers working on national accounts; research on financial market economics.
